,

New polynucleotides, specifically nucleic acid fragments encoding flowering locus T gene (FT) or terminal flower (TFL), or Apetala3 (Ap3) homologs, useful for floral development, e.g. engineering plant flowering time.

Claim 6; SEQ ID NO 63; 109pp; English.

밁

Ś 밁 δ 밁 δ

Crist, second, third, fourth or fifth nucleotide sequence, or their complement encoding a polypeptide either having flowering locus T gene (FT), terminal flower (TFL), or Apetala3 (Ap3) homologue activity. Also Creation of the comprising the polynucleotide; (2) a recombinant DNA construct comprising the polynucleotide; (3) a recombinant CR DNA construct comprising the polynucleotide; (4) a cell comprising the creating plant comprising the construct; (5) producing a plant comprising transforming call with the polynucleotide, and regenerating a plant from the construct; (7) a seed comprising the recombinant DNA construct; (8) an creating plant comprising the recombinant DNA construct; (8) an creating plant comprising a first nucleotide sequence contains at least 30 nucleotides, and where the creating plant producing a plant from the creating plant producing a plant from the creating plant producing and plant from the creating plant producing and plant from the creating plant producing and the polynucleotide comprising the polynucleotide where the creating plant polynucleotide includes the second, third, fourth, fifth or creating plant polynucleotide comprising isolating the polynucleotide comprising isolating the polynucleotide comprising isolating the polynucleotide comprising transformation. The present sequence represents an FT homologue nucleotide sequence from the present invention.

Sequence 13400 BP; 3962 A; 2948 C; 2695 G; 3795 T; 0 U; 0 Other;

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Issued Patents NA:*

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     IDENTITY_NUC

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Published Applications NA Main:*
